

Earth Island Institute

2002 Annual Report

David Ross Brower (1912 - 2000)

MISSION:

Life on Earth is imperiled by human degradation of the biosphere. Earth Island Institute develops and supports projects that counteract threats to the biological and cultural diversity that sustain the environment. Through education and activism, these projects promote the conservation, preservation and restoration of the Earth.

Dear Friends of Earth Island,

We are pleased to provide you with a glimpse of some of what we accomplished last year with this, our 2002 Annual Report. We offer it in hopes that it will show you some of the many successes of our current projects and the work you've been enabling with your generosity as well as giving you a financial picture of the organization. The year was full of financial challenges for many of us—not only the public interest sector, but in the private sector as well. We are therefore that much more indebted to you, both our long-standing and new supporters, for the many ways in which you've chosen to give.

In 2002 we celebrated our twentieth anniversary. The celebration was muted, however, as we saw a year of increased pressure on the environment. Nonetheless, we continued to fight back and make progress, with new projects and easier ways for members to take action. The *Earth Island Journal* was redesigned, making it easier for readers to learn about important environmental issues while promoting citizen action by alerting them to direct steps to take at the end of each article. In September we held our third annual Brower Youth Awards. The evening continues to be one of the most inspirational of the year as we honor six magnificent young people who have demonstrated exceptional leadership in the environment. And our project support program continues to incubate amazing projects working all over the globe including several new ones in the past year. Despite the increased setbacks that faced the environment last year, as well as those challenges yet to come, we remained and will continue to be committed to working for solutions to environmental problems by promoting citizen action and nurturing a diverse network of projects.

We hope that this report will inspire you to find out how you can become further involved with our work. We actively seek to forge new partnerships with others, support the efforts of creative and informed environmental visionaries, and find out more about those who sustain and encourage us.

Wishing you the very best in all your endeavors,

A handwritten signature in black ink that reads "John A. Knox".

John A. Knox
Executive Director

A handwritten signature in black ink that reads "David Phillips".

Dave Phillips
Executive Director

A handwritten signature in black ink that reads "Bob Wilkinson".

Bob Wilkinson
Board President

“My secret is that I surround myself with bright young people, then stand back, and bask in the glow of their accomplishments.”

— David Ross Brower

Brower Youth Awards

Since its founding over 20 years ago by David Brower, Earth Island Institute has been a powerful force for leadership development as well as environmental change. Brower found inspiration in the vitality of young people, and he consistently championed youth leadership. He believed, as did Margaret Mead, in the idea of “This Island Earth,” a unique source of life, not replicated anywhere in the universe. Brower inspired fellow environmentalists and taught them — young and old — the power of their own commitment. He reminded audiences again and again of Goethe’s words: “Anything you can do, or dream you can, begin it. Boldness has genius, power, and magic in it.”

The Brower Youth Awards, begun in 2000, are the only national environmental awards for youth activists that carry with them a substantial cash prize of \$3,000. Each winner is honored at a ceremony held in Brower’s hometown of Berkeley, California. From there they embark upon a series of leadership development, mentoring, and networking activities aimed at furthering their activism and launching the next generation of environmental heroes. These prestigious awards are bestowed on those whose work on behalf of communities and the environment epitomizes the principles of Conservation, Preservation and Restoration—what Brower called “CPR for the Earth.”

Brower was fond of reminding us “there is no such thing as a permanent environmental victory — only a stay of execution.” We in the environmental movement are finding this truer than ever today, as the current administration rolls back hard-won environmental protections. Developing new environmental leaders who are committed to this long-term struggle is crucial to the survival of the Earth as we know it.

2002 Brower Youth Award Recipients

Clockwise from left:

Jessian Choy, age 21, of Santa Cruz, CA, for founding the University of California, Santa Cruz Student Environmental Center (SEC), a new model for involving students in planning campus policies that protect the environment. In its first year, SEC's diverse coalition has advanced 15 campus greening projects and petitioned the University to comply with the Kyoto Protocol on global warming.

Max Harper, age 20, of Hotchkiss, CO, for developing a sustainable living theme house that was adopted as a model by Colorado College to engage students and administrators in environmental sustainability and to build a community epicenter of campus activism.

Stefanie Lacy, age 17, of Bandera, TX, for establishing a paper recycling program in the "Cowboy Capital of the World" that has diverted 280 tons of paper from a landfill, saving nearly 4,600 trees.

Amir Nadav, age 17, of Eagan, MN, whose efforts to reduce his fellow Minnesota students' exposure to dangerous diesel exhaust led to the passage of statewide legislation that bans excessive idling of school buses and requires schools to relocate air-intake vents away from parking areas.

Ethan Schaffer, age 21, of Sagle, ID, creator of Organic Volunteers (www.OrganicVolunteers.com), a national outreach and education program for sustainability and organic food systems as solutions to both health and environmental problems.

Nathan Wyeth, age 17, of Chevy Chase, MD, Co-Founder and Chair of Student Action on the Global Economy (SAGE), created in response to the environmental threats posed by the current model of globalization. SAGE has used public protest, lobbying of Congress, and public education to halt the continued weakening of U.S. environmental laws and exploitation of people in less wealthy countries by international trade and development policy.

PROMOTING CITIZEN ACTION

Earth Island Journal

2002 saw some exciting changes in the design of our award-winning quarterly publication, *Earth Island Journal*. There were a number of modifications made to the organization and layout of the magazine, primarily in response to the results of a reader's survey conducted early in the year. While you'll still find the same great environmental features and investigative reporting you won't find anywhere else, the new *Journal* enables us to go into greater depth with each story and provides more information on positive actions you can take to participate in our work. In addition, you'll find expanded Earth Island news highlighting the progressive work of our projects in over 40 countries around the world.

The information doesn't stop with the quarterly journal. Earth Island Institute continues to promote citizen action and educate the public through our website at www.earthisland.org. This year, over 650,000 people visited our site to learn more about what individuals can do to be an active part of creating environmental solutions.

2002 Project Descriptions

Contact information is listed at the end of each project description. Those projects without a mailing address listed receive mail c/o our 300 Broadway office.

Aral Sea Environmental Alliance promotes local and international initiatives to ensure the survival of the Aral Sea and the people living in its basin. aralsea@earthisland.org.

Baikal Watch works to protect the world's largest freshwater lake and its biodiversity by promoting the growth of the Russian environmental movement, strengthening Russia's environmental laws, and supporting the development of ecological alternatives such as ecotourism to industry threats. Gary Cook, Project Director. baikalwatch@earthisland.org.

Bay Area Wilderness Training leads adult youth workers on outdoor adventures, during which they are taught the skills to conduct safe, high quality wilderness trips for young people. Once their training is complete, they are allowed to borrow outdoor equipment, free of charge, to outfit their group. Kyle Macdonald, Executive Director. www.bawt.org.

Boreal Footprint Project works to preserve the threatened northern evergreen forests by mapping the ecological footprint of U.S. energy imports in the boreal, fostering sustainable management and consumption of forest resources, and promoting the role of indigenous and local boreal communities. Chanda Meek, Project Director. www.borealfootprint.org.

Borneo Project works with indigenous groups in Borneo to promote human rights, ecological justice and community development through citizen diplomacy, training, mapping, alternative energy, education and legal support. Wick Pancost, Executive Director. 1771 Alcatraz Ave., Berkeley, CA 94703. (510) 547-4258; www.earthisland.org/borneo.

The Brower Fund provides advice, organizational support and small grants for short-term campaigns and projects and works to preserve the integrity and public awareness of David Brower's vision and legacy. Mikhail Davis, Project Director. mdavis@earthisland.org.

INCUBATION
SUPPORT
LEADERSHIP

Campaign to Safeguard America's Waters

In the belief that "all U.S. waters should be swimmable and fishable," C-SAW assists conservation groups across the country as they challenge weak state and federal regulations that allow "mixing zones," an area in a body of water where pollutants are diluted. Gershon Cohen, Ph.D., Project Director. Box 956, Haines, AK 99827, (907) 766-3005; gershon@aptalaska.net.

Center for Safe Energy works closely with environmental activists in the former Soviet Union to promote development of alternative clean energy technologies and energy conservation. Francis Macy and Enid Schreiber, Directors. 2828 Cherry St., Berkeley, CA 94705, (510) 883-1177; cse@earthisland.org.

China Biodiversity Network Led by an aquatic biologist, China Biodiversity Network promotes local and international programs that help ensure the protection of key species and key habitats in China and its northern border regions. Jeanny Wang, Project Director. 1705 Hobart St., NW, Washington, DC 20009, (202) 588-9419; tadpole@igc.org.

Circle of Life Foundation and Julia Butterfly Hill promote efforts to protect ancient forests, empower youth and create alliances through education, outreach and networking. P.O. Box 3764, Oakland, CA 94609; (510) 601-9790; info@circleoflifefoundation.org.*

City Talk promotes sustainable development by developing active sister-city affiliations that enable participants to communicate about development and technology through the Internet. Nicola Swinburne, Project Director. city-talk@earthisland.org.

Climate Solutions helps pioneer solutions to global warming by demonstrating a model of regional leadership that strengthens communities and creates economic opportunities. 610 4th Ave. E, Olympia, WA 98501; (360) 352-1763; info@climatesolutions.org.**

EcoVillage Farm Center uses a 5+-acre site in Richmond, CA, to serve as a model village and farm where residents of inner city communities, particularly children, can learn about the links between their health and that of the urban natural environment. Shyaam Shabaka, Executive Director. 5188 Coronado Ave., Oakland, CA 94618, (510) 653-5915; eco-village@earthisland.org.

Faultline, California's web-based environmental magazine, provides broad and balanced coverage of environmental interest, from urban pollution and designing livable cities, to sustainable agriculture and farm labor issues, to ranching, mining, wilderness management and more. Chris Clarke, Editor. www.faultline.org.

Global Service Corps provides service-learning opportunities for adults in Tanzania and Thailand. GSC's village-based programs focus on sustainable development, health, and education, and can be short-term (three-four weeks) or long-term (two-three months). Rick Lathrop, Executive Director. www.globalservicecorps.org.

Grassroots Globalization Network promotes democratic ways for people to create healthier local economies, safer communities and a cleaner environment. Aaron Lehmer, Director. www.earthisland.org/ggn.

Hydro Nova aims to change wastewater from on-site and small community systems from a disposal problem to a resource for beneficial use through education, research and action to support the use of innovative treatment systems. Robert Feinbaum, Director. 3001 Ashbrook Ct., Oakland, CA 94601; bobfeinbaum@earthlink.net.

International Marine Mammal Project (IMMP) is leading the global effort to stop the slaughter of dolphins, to end commercial whaling and to end the use of drift nets and other destructive fishing practices. IMMP led the successful return of the orca whale Keiko to his native habitat in Iceland. David Phillips, Director. marinemammal@earthisland.org.

John Muir Project's immediate goal is to end all timber sales on national forests and to redirect timber subsidies into worker retraining and ecological restoration. Chad Hanson, Director. P.O. Box 697, Cedar Ridge, CA 95924, (530) 273-9290; www.johnmuirproject.org.

Kids for the Bay Through field trips or classroom presentations, Kids for the Bay leaders teach children K-6 about the San Francisco estuary ecosystem. Scholarship programs for low-income schools ensure that economics is no barrier to environmental education. Mandi Billinge, Executive Director. 1771 Alcatraz Ave., Berkeley, CA 94703, (510) 985-1602; kftb@aol.com.

Ma'at Youth Academy works to improve public and environmental health in urban areas by developing and modeling multicultural environmental education, promoting economic opportunities for at-risk youth and increasing community involvement in environmental protection. Sharon Fuller, Director. 445 Valley View Rd., Suite D, Richmond, CA 94803, (510) 222-6594; mya@maatyouthacademy.org.

Mangrove Action Project's global network addresses the degradation of mangrove forest ecosystems and promotes the rights of local coastal peoples towards sustainable management of coastal environments. Alfredo Quarto, Project Director. PO Box 1854, Port Angeles, WA 98362, (360) 452-5866; mangroveap@olympus.net.

ReThink Paper is dedicated to protecting forests by promoting the production and consumption of ecologically sound paper and encouraging strategies that reduce paper use. Nancy Hurwitz, Project Director. 45425 SE Marmot Rd., Sandy, OR 97055, (503) 668-5123; rtp@earthisland.org.

Sacred Land Film Project works to deepen public understanding of sacred places, to rekindle respect and reverence for the land within technological society and to help protect sacred sites and indigenous cultures by distributing its award-winning film *In the Light of Reverence*. Christopher "Toby" McLeod, Producer and Director. PO Box C-151, La Honda, CA 94020, (650) 747-0685; eif@earthisland.org.

Safe Food and Fertilizer provides regulatory and technical support to grassroots organizations, consumers and farmers in an effort to increase public awareness of the use of waste-derived fertilizers and to establish protective fertilizer laws and regulations. Patricia Martin, Director. 617 H St. SW, Quincy, WA 98848; (509) 787-4275; martin@nwi.net.

SAVE International works with local communities to protect the habitat of Black-faced Spoonbills along the Asian Flyway by promoting the alternative economic development and long-term sustainability of lagoons and local communities. Wen-ling Tu, Director. UC Berkeley Dept. of Landscape Architecture, 202 Wurster Hall, Berkeley, CA 94720, (510) 594-9466; spoonbill@uclink4.berkeley.edu.

Southern Rockies Watershed Network works to foster sustainable management of watershed resources in the Southern Rockies Ecoregion of Colorado and northern New Mexico by monitoring and supporting community-based watershed initiatives. Brad Lewis, Director. PO Box 1351, Boulder, CO 80306, (720) 849-6412; srrp@cris.com.

Sustainable World Coalition's mission is to increase effective participation by ordinary people in global environmental and social justice governance at all levels by supporting civil society's ability to speak with a more united, more powerful voice. At the UN World Summit on Sustainable Development in Johannesburg in 2002, it organized a well-publicized six-day hearing that included over 110 witnesses and eminent panelists from 42 countries. Vinit Allen, Director. 29 Hickory Avenue, Corte Madera, CA 94925; (415) 927-6636; info@worldhearing.org.

Tibetan Plateau Project promotes biodiversity, conservation, and sustainable development of local communities in the Tibetan Plateau region through research, grassroots action and public education. Justin Lowe, Director. tppei@earthisland.org.

Tomales Bay Institute works to revive the concept of the commons in American public life and debate and to propose new ways to advance and protect the commons in all its many facets. Jonathan Rowe, Director. PO Box 427, Pt. Reyes Station, CA 94956, (415) 663-8560; jonrowe@earthlink.net.

West Africa Rainforest Network U.S. (WARN U.S.), through education, advocacy and technical assistance, supports international campaigns and local communities in West Africa to protect their livelihoods and the region's remaining 10% of rainforests from corporate and political destruction. Stephanie Alston, Project Director. warn@earthisland.org

WildFutures works to develop and implement wildlife conservation strategies that protect carnivores and ecosystems. Sharon Negri, Director. 343 Wallace Way, NE, Ste. 12, Bainbridge Island, WA 98110; snegri@igc.org.

Yggdrasil Institute works on nuclear and environmental issues in France and the US, including projects such as a "green" map of Paris and reports on U.S. uranium enrichment. Mary B. Davis, Director. PO Box 131, Georgetown, KY 40324, (502) 868-9074; marybdavis@earthlink.net.

**Circle of Life Foundation separated from Earth Island Institute late in 2002 and formed its own 501(c)(3) corporation.*

***Climate Solutions separated from Earth Island Institute early in 2003 and formed its own 501(c)(3) corporation.*

CONSERVATION PRESERVATION RESTORATION

2002 Selected Project Highlights

Baikal Watch broke ground on the Great Baikal Trail, which will be approximately 2,000 miles long and will encircle Lake Baikal. They will bring in hundreds of local and international volunteers to help design and build the trail, a project that is expected to take a minimum of ten years to complete.

...Completed an EIA (environmental impact assessment) with various Baikal groups on a proposed 2,000 mile oil and gas pipeline that would run from Baikal to China. They have supplied dozens of local grassroots groups located along the proposed route with information educating them on the potential effects of the pipeline. They are working with the National Parks and other groups in the region to prepare a lawsuit preventing the construction of this illegal pipeline.

...Helped compile the first Environmental Impact Assessment (EIA) on a prospective uranium mine in the Republic of Buryatia, successfully delaying its development.

Bay Area Wilderness Training conducted a special camping trip in Yosemite National Park for the six recipients of the 2002 Brower Youth Awards, an awards program established in 2000 that honors youth environmental achievement in the areas of conservation, preservation and restoration.

The Borneo Project assisted villagers from Long Lawen in completing the first community-owned and operated micro-hydroelectricity system in Sarawak. The system now provides continuous renewable energy to 80 families, powering lights at night and cottage industries during the day.

Center for Safe Energy completed a three-year training and grant program for women's NGO (nongovernmental organization) leadership in Kazakhstan.

Global Service Corps launched international health internship programs in Tanzania and Thailand for pre-med and healthcare students as well as healthcare professionals interested in international healthcare.

...Established a sustainable agriculture training site at Tengeru Agricultural College in Arusha, Tanzania.

Grassroots Globalization Network expanded their Community Solutions Campaign, which highlights a bottom-up approach to sustainable development.

...Published *The Informed Activist*, a guide to progressive activist issues on the Internet. The guide lists over 700 web sites and is printed on 100% post-consumer waste paper.

International Marine Mammal Project

(IMMP) hosted the daily activist newsletter, “ECO,” a publication detailing the proceedings of the 2002 International Whaling Commission (IWC). ECO is written and published by representatives of nonprofit environmental and animal welfare organizations that attend the annual IWC meetings, and is edited by the International Marine Mammal Project.

... Provided over \$140,000 in loans to local fishermen and whale-watching guides in San Ignacio Lagoon, Baja, Mexico, for the purchase of four-stroke motors. These motors emit far less air and water pollution and are significantly quieter than two-stroke motors, thus benefiting both the whales and the indigenous ecotourism industry ... played a key role in the release of Keiko, the orca star of the film *Free Willy*, into the waters surrounding his native Iceland. Keiko is now swimming free in Norway with IMMP overseeing his ongoing rehabilitation and welfare.

... Continued their campaign against Low Frequency Active (LFA) Sonar to block this destructive U.S. Navy noise bombardment from harming whales and other marine life. The Bush administration sought to exempt the U.S. Navy from the Marine Mammal Protection Act. IMMP was successful in blocking this legislation in Congress.

... Continued their extremely successful tuna-monitoring program, ensuring that tuna supplies remain truly “dolphin safe,” while expanding their coverage to several new companies.

John Muir Project stopped the logging of nearly 20,000 acres of mature and old growth forests in the Sierra Nevada.

Kids for the Bay trained 120 teachers to facilitate environmental education programs in the San Francisco Bay area.

... Workshops inspired 3,000 elementary school students, 120 teachers, and approximately 500 parents to participate in habitat restoration, pollution reduction, and safe bay food consumption.

Ma’at Youth Academy published and distributed a Public Health Advisory, cautioning individuals about the dangers of methylmercury in fish caught from San Francisco Bay.

... Disseminated public and environmental health information to over 5000 people through public speeches, panel discussions, and forums, thus building capacity in communities of color and low-income areas to significantly reduce public exposure to environmental hazards.

... Helped defeat plans for locating yet another power plant in Richmond, California.

Mangrove Action Project opened a second regional office in Bali, Indonesia, to partner with Indonesian NGO's (nongovernmental organizations) and fisherfolk communities in mangrove rehabilitation, environmental education, and the creation of a Coastal Community Resource Center. ... Advisor and co-founder Pisit Charnsnoh was a recipient of the Goldman Environmental Prize.

Sacred Land Film Project's feature length film, *In the Light of Reverence*, originally nationally broadcast on PBS TV in 2001, was made available in 2002 for community screenings. A corresponding Teacher's Guide and DVD were also completed.

Sustainable World Coalition held the World Sustainability Hearing in Johannesburg, South Africa, as a parallel event to the World Summit on Sustainable Development. The hearing featured 113 panelists and witnesses from 42 countries, including Jane Goodall and over half of the Goldman Environmental Prize winners.

West Africa Rainforest Network U.S. trained over 150 Nigerian activists in fundraising, organizational development, marketing and media relations.

Earth Island Founder's Circle Members

The Founder's Circle, honoring our late founder, David Ross Brower (1912-2000), is our way of recognizing those donors who make an annual contribution of \$500 or more. Earth Island acknowledges the generous support of our Founder's Circle members with special benefits and activities including: Invitations to conservation roundtables held at our San Francisco office highlighting leading conservationists, Earth Island Institute project directors, and others taking a lead in the environmental arena; invitations to regional social events with Earth Island Institute's executive directors, project directors, and leaders of the worldwide environmental movement; and recognition in our annual report.
